ELF ATMO MAX, has been specially designed for 4-stroke atmospheric engines with high volumetric ratio. ELF ATMO MAX allows to extract a maximum of power from atmospheric engines operating at high rpm. Without advanced settings, ELF ATMO MAX provides significant gains in power and reliability. However, to get all the advantages of this product, it is necessary to optimize the engine mapping (Air / Fuel ratio, Ignition advance...).

PROPERTIES	UNIT	ELF ATMO MAX	UNLEADED 98 OCTANE	2020 FIA APPENDIX J
